

NEW Cisco Certified Network Associate – Network Security CCNA – SECURITY

This 64 hour hands-on course prepares students to become IT professionals who are responsible for network security. This industry recognized certification validates an individual's skills for job roles such as Network Security Specialists, Security Administrators, and Network Security Support Engineers. Course topics include installation, troubleshooting and monitoring of network devices to maintain integrity, confidentiality and availability of data and devices and develops competency in the technologies that Cisco uses in its security structure. Students will learn how to develop a security infrastructure and policies, recognize threats and vulnerabilities to networks, and mitigate security threats.

Prerequisite:

Valid Cisco Certified Network Associate Certification - 640-802 CCNA or 640-822 ICND1 & 640-816 ICND2

Certification Exam:

- 640-553 IINS - Implementing Cisco IOS Network Security (VUE Testing Center)

Cost: \$2,495 (test vouchers not included)

CompTIA A+ Certification – Computer Network Technician

Build and take home a PC!

This program prepares students for a career as a computer technician repairing personal computers and also serves as a strong foundation course. This 180-hour hands on course covers installation and upgrades, diagnosis and repair, system configuration, as well as safety and customer interaction. Students will assemble and disassemble different types of personal computers. This course provides training and covers a wide range of vendor and product neutral networking technologies. This course will help the student successfully complete the A+ Certification exams. A+ toolkit included.

Upon obtaining the A+ certification, the student can earn up to 19 credits toward a DCCC Associate Degree in Network Engineering.

Cost: \$4,399 (test vouchers included)

Microsoft Certified Desktop Support Technician – MCDST

This 104-hour hands-on course provides students with skills to become a Microsoft Certified Desktop Support Technician (MCDST). The MCDST credential validates that you have the skills to successfully support end-users, troubleshoot a Microsoft operating system environment and application environment. Topics include how to resolve operating system issues by telephone, by connecting to an end user's system remotely, or by visiting an end user's desktop. Students will also gain working knowledge of operating in a workgroup or Active Directory domain environment and how end users are affected by each environment.

Certification Exam:

- Exam 70-271: Supporting Users and Troubleshooting a MS Windows XP OS (Prometric Testing Center)
- Exam 70-272: Supporting Users and Troubleshooting Desktop Applications on a MS Windows XP OS (Prometric Testing Center)

Cost: \$1,995 (test vouchers included)
